AIR STATION ORDER 2355.1C

From: Commanding General
To: Distribution List

Subj: RADIO PROCEDURES GUIDE AND CALL SIGNS

Ref: (a) JANAP 119K (C) (NOTAL)

Encl: (1) Call Sign Assignments by Net

1. Purpose. To emphasize proper radio procedures and to assign call signs in accordance with the reference for all non-tactical radio nets operating on board MCAS Cherry Point.

2. Cancellation. AirStaO 2355.1B.

3. Background. Reliable radio communications are essential to mission accomplishment during normal operations and are critical during emergencies. Proper radio procedures and positive identification of transmitting stations are key to achieving reliable communications.

4. Definitions. Within the context of this Order the following definitions apply:

a. Net Controlling Authority (NCA). That commanding officer/department head under whose cognizance a net operates.

b. Net Control Station (NCS). That station directed to control the communication traffic on a particular net.

c. Directed Net. Those nets in which stations are required to obtain permission from the NCS to communicate with other stations on the net.

d. Free Net. Those nets in which stations are not required to obtain permission from the NCS to communicate with other stations on the net.

5. Net Information. MCAS Cherry Point call signs are composed of a prefix and an alpha-numeric designator. The prefix "Smiling Jack" identifies the nets as MCAS non-tactical nets. This prefix is not required during communications between these nets. The alpha-numeric designator identifies the assigned net by its alpha character, and the user by its numeric character(s). The alpha designator is mandatory for inter-net communications (communications between

28 Jun 93

separate nets), but may be omitted for intra-net communications (communications within the same net) unless it is specifically required by the respective NCA. The nets are listed below along with any amplifying information.

a. Commanders Net. A free net composed of both MCAS Cherry Point and 2d Marine Aircraft Wing (2d MAW) Commanders and Staff officers. The stations on this net may be paged via the MCAS Cherry Point telephone system. No NCA is assigned.

b. Internal Security Net. A directed net utilized by the security forces of MCAS Cherry Point. The NCS is Alpha Two Zero One, and the NCA is the Security Officer.

c. Navy Boats Control Net. A free net utilized by the Naval Boat Docks and Target Operations for safety and control of boat and range operations. The NCA is the OIC of Target Operations.

d. Vehicle Ground Control Net. A directed net used to control vehicular traffic on the runways. The NCS is Cherry Ground, and the NCA is the Airfield Operations Officer.

e. Fuel Department Net. A free net used for the coordination and control of military and civilian fuel trucks and personnel. The NCA is the Officer in Charge, Fuel Department.

f. Natural Resources and Environmental Affairs (NREA) Net. A free net used for coordination and control of the Natural Resources and Environmental Affairs personnel. The NCA is the NREA Officer.

g. Facilities Maintenance Control Net. A free net used by the Facilities Maintenance Department for control of operations. The NCA is the Facilities Maintenance Officer.

h. Telecommunications Net. A free net used by the Telecommunications and Information System Directorate (G-6) maintenance personnel. The NCA is the Director, G-6.

i. Fire/Hospital Net. A free net used for emergencies and recall of personnel engaged in firefighting and medical services. This net is also used for coordination of essential safety personnel when no land lines are available. The net is subject to the constraints imposed by the NCAs. The NCAs are the Commanding Officer, Naval Hospital for medical stations and the Security Officer for firefighting stations.

j. Supply Net. A free net used for communication between the Material Delivery Branch, delivery trucks, and the NISTARS system coordination. The NCA is the Director of Supply.

k. Housing Department Net. A free net used as the Housing Department Operations net. The NCA is the Housing Officer.

28 Jun 93

l. Motor Transport Net. A directed net used as the Motor Transport Operations net. The NCS is MIKE THREE FIVE, and the NCA is the Motor Transportation Officer.

m. Crash Emergency Net. A directed net activated and used during airfield emergencies to coordinate rescue efforts. Due to the nature of this net, the composition of stations is varied and dependent upon requirements. Primary users are the stations listed for the Vehicle Ground Control Net. The NCS is CHERRY THREE NINE, and the NCA is the Airfield Operations Officer.

n. Naval Aviation Depot (NADEP) Command Net. A free net used by the NADEP Command echelon, operating on the NADEP Security channel. The NCA is the NADEP Security Chief.

o. NADEP Production Engineering Net. A free net used by the NADEP Production Engineering Department. Stations may omit usage of the alpha designator, unless entering another net. The NCA is the 600 Department Head.

p. NADEP Safety Net. A free net used by the NADEP Safety Office. Stations MUST use the alpha designator. The NCA is the NADEP Safety/Health Office Head.

q. NADEP Security Net. A free net used by the NADEP Security Department. Stations MUST use the alpha designator. The NCA is the NADEP Security Chief.

r. NADEP Transportation Net. A free net used by the NADEP Transportation Department. The NCA is the NADEP Production Control Division Head.

s. NADEP Material Management Net. A free net used by the NADEP Material Management Department. The NCA is the NADEP Material Management Department Head.

6. Emergency Operations. During emergencies (i.e., destructive weather) a Disaster Control Center is established. This center utilizes "DISASTER CONTROL" as its call sign and is capable of entering any operating net. The Disaster Control Center coordinates all activities of essential services. All NCAs are responsible for ensuring complete cooperation and rapid response to Disaster Control Center messages during an actual emergency or operational test.

7. Radio Procedures. The following rules are essential to transmission security and will be strictly enforced.

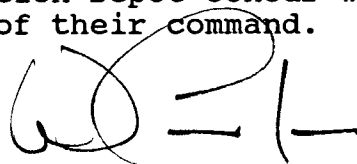

28 Jun 93

- a. Only transmissions authorized by proper authority will be made.
 - b. The following are specifically forbidden:
 - (1) Unofficial conversation between operators.
 - (2) Profane, indecent, or obscene language.
8. Cross Net Procedures. Many stations, by virtue of their mission, may be required to communicate with stations on other nets. On such occasions, that station MUST use its assigned alpha-numeric designator upon entering another net.
9. Call Signs. The enclosure is a listing of the nets, their respective stations, and the call signs assigned to each.
- a. Call signs are assigned by the Director, G-6.
 - b. Requests for modification, addition, and/or deletion of information contained in the enclosure shall be submitted to the Director, G-6 (Attn: Communication-Electronics Maintenance Officer).
10. Action. The following is provided for guidance and compliance.
- a. Communication-Electronics Maintenance Officer
 - (1) Monitor each net on a regular basis, ensuring that proper radio procedures are employed.
 - (2) Notify the responsible NCA of communication discrepancies noted during monitoring.
 - (3) Ensure that a qualified instructor is available to conduct classes in proper radio procedures and circuit discipline.
 - b. Net Control Authority
 - (1) Take action as necessary to implement the contents of this Order.
 - (2) Take immediate action to correct discrepancies noted during communications monitoring sessions.
 - (3) Ensure that a copy of this Order is prominently posted near each fixed station and is available to the operators of each mobile and portable station.

28 Jun 93

11. Summary of Revision. Paragraph 5 was changed to provide clearer understanding of call sign composition and to ensure uniformity in net assignment. Paragraph 9 reflects a reorganizational change to the G-6 Directorate vice the Communication-Electronics Department. Enclosure (1) was reformatted, allowing quicker reference within the directory. Enclosure (2) was deleted to omit redundancy.

12. Concurrence. The Commanding General, 2d Marine Aircraft Wing and the Commanding Officer, Naval Aviation Depot concur with this Order insofar as it pertains to members of their command.

A handwritten signature in black ink, appearing to read 'W D Carr Jr', with a stylized flourish at the end.

W. D. CARR JR
Chief of Staff
